

EPIDEMIOLOGICAL DASHBOARDS (“Starter Kit”)

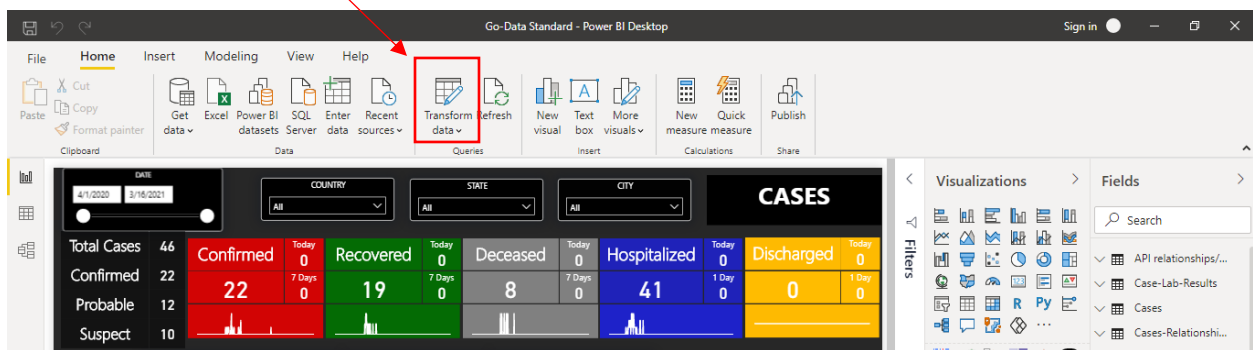

How to connect your Go.Data instance to the PowerBI dashboard library.

Step 1: Download Microsoft Power BI Desktop and proceed with the following steps.

<https://www.microsoft.com/en-us/download/details.aspx?id=58494>

Step 2: Connecting to the PowerBI dashboard library

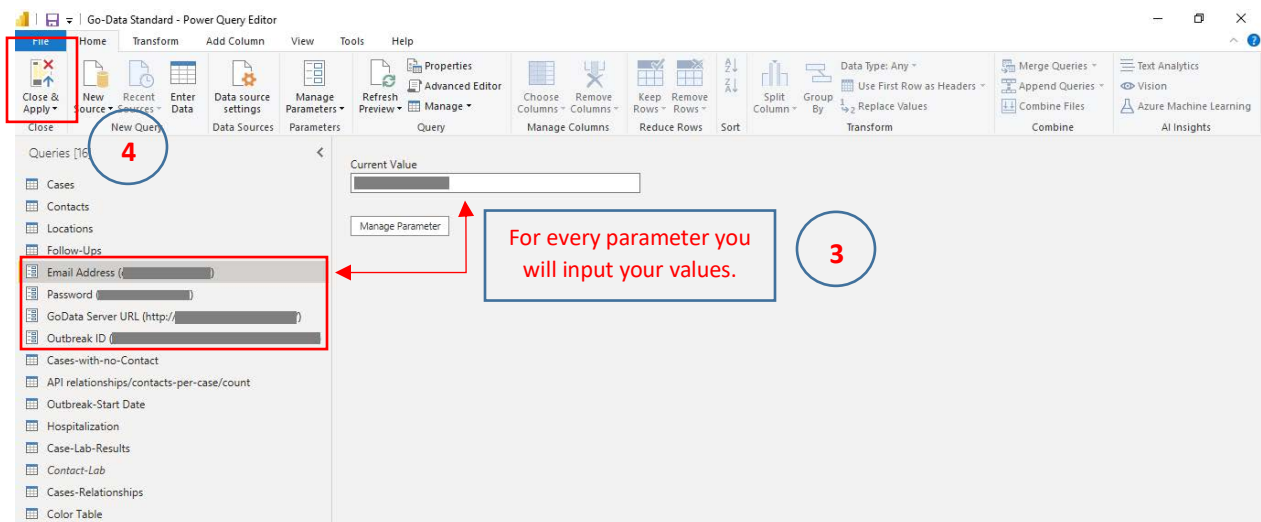

1. Open the Go-Data Standard.pbix file on the Go.Data Github Site: <https://worldhealthorganization.github.io/godata/>
2. Click on the Transform Data icon. (As shown below)

3. Change the following parameters.

- a. **Go.Data Server URL:** The URL of your server where Go.Data is
- b. **Email address:** The email address you use to access Go.Data
- c. **Password:** The password you use to access Go.Data
- d. **Outbreak ID:** This outbreak ID is found when you enter your Go.data installation, go to outbreaks, roll your mouse over the outbreak of interest and select modify. On the URL section, you will see a unique identifier, this is the **Outbreak ID** that will be used when building your query.

4. Click on Close & Apply.

Please note that this you will need to enter in your own credentials for data to appear in the dashboard.
